

Languages/Frameworks: JavaScript, TypeScript, Python, SQL, React, React Native, Node.js, Flask, FastAPI

Tools/Technology: Redux Toolkit, PostgreSQL, SQLAlchemy, Alembic, JWT, Auth0, CSRF, Docker, Git, Render, Railway

Testing/Environments: Pytest, Mocha, VS Code, Xcode

SOFTWARE PROJECTS

FinSight (Technical Residency) | React | TypeScript | Redux Toolkit | Tailwind CSS | Render [GitHub](#) / [Live](#)

- Developed responsive frontend components and features for an AI-powered investment platform using React, TypeScript, Redux Toolkit, and Tailwind CSS, integrating with FastAPI backend services and Auth0 authentication.
- Built portfolio management, market trends, and AI chat interfaces with centralized Redux state management, reducing unnecessary API requests while keeping application data synchronized across the user experience.
- Collaborated in an Agile team using GitHub, implementing reusable components, API integrations, and production deployments to deliver a scalable full-stack financial application.

Patriotic Keys (Client Project) | Python | FastAPI | Docker | React-Native | Expo | PostgreSQL [GitHub](#)

- Built a cross-platform mobile and web application using FastAPI, React Native, and Expo to manage locksmith inventory, invoices, and vehicle key tracking, improving operational efficiency.
- Integrated PDF parsing and ML-based OCR (optical character recognition) to extract VINs from scanned invoices, automating invoice creation and reducing manual entry errors.
- Developed a secure, containerized backend using FastAPI, Docker, and async PostgreSQL operations, improving scalability, deployment consistency, and system resilience.

WORK EXPERIENCE

Freelance | *Software Developer* | Remote

April 2023 - Current

Surface Clean (Client Project) | Python | FastAPI | Alembic | React | Redux | PostgreSQL | Railway [GitHub](#) / [Live](#)

- Designed and developed a full-stack B2B web platform for Surface Clean, enabling internal users to perform complete CRUD operations on industrial cleaning machine listings.
- Engineered a secure, modular admin system with robust backend architecture using FastAPI and PostgreSQL, supporting streamlined inventory management and image uploads.
- Built a client-facing web application to showcase refurbished machines with responsive design, intuitive UI, and clear machine categorization for easy navigation.
- Implemented best practices in auth, environment configuration, and separation of concerns to ensure scalability, maintainability, and deployment flexibility.

Chili's Grill & Bar | *Server* | McAllen, TX

November 2025 - Current

- Deliver high-quality customer service in a fast-paced, high-volume restaurant environment while managing multiple priorities simultaneously.
- Build strong communication and problem-solving skills by resolving guest concerns and collaborating with kitchen and front-of-house staff.

United States Marine Corps | *Sergeant* | Various, Global

June 2004 – June 2012

- Led and collaborated in high-stakes, cross-functional teams across multiple deployments, mastering structured communication, adaptability, and a results-driven mindset.
- Mentored and trained over 5,200 Marines in technical systems (secure radio communications) and tactical operations, while troubleshooting and maintaining critical infrastructure under pressure.

EDUCATION

App Academy \ Full Stack Web Development | Remote

2025

Mesa Community College \ *Associate's in Business Management and Entrepreneurship* | Mesa, AZ

2019
